DEPARTMENT OF BIOMEDICAL ENGINEERING SEMINAR SERIES
PRESENTS

Emre Toker
Mentor-in-Residence, Managing Director of Innovation Collaboratory,
Department of Agricultural Education, Technology and Innovation
Innovation Collaboratory

“Entrepreneurship for Biomedicine”

BIO: Emre Toker is currently the Entrepreneurship Mentor-in-Residence for the College of Agriculture and Life Sciences at the University of Arizona and the Co-Director of the Entrepreneurship for Biomedicine program. He founded and successfully exited 3 highly profitable biomedical start-up companies and taught innovation and entrepreneurship to a broad range of students and faculty, nationally and internationally, including students of science, engineering, medicine, social sciences and the liberal arts. As an active early stage angel investor for 20 years, he gained significant experience in a broad range of industries. He is a co-Principal Investigator on two 5-year National Institutes of Health grants to develop entrepreneurial training programs for medical school students and biomedical researchers.

ABSTRACT: Entrepreneurship for Biomedicine (E4B) is a National Institutes of Health funded program to train biomedical researchers in core innovation and entrepreneurship skills. In this online program, students learn how to identify entrepreneurial opportunities, how to validate their innovations, how to build inclusive and effective teams, and how to sell their innovations to various audiences. In this seminar, Emre Toker will provide an overview of the first year of the E4B program results, as well as a high level look at the topics covered in the program.

Please join us on

Monday, January 27th, 2020
12:00-12:50 pm, Keating Bldg., Room 103
Refreshments will be available at 11:50 am

Hosts: Drs. DK Kang and Minkyu Kim
dkkang@email.arizona.edu & minkyukim@email.arizona.edu
